### TCIA Accredited

NG Gilbert Services is accredited under the Utility Contractor – Tree Service Company Accreditation program administered by the Tree Care Industry Association.

Achieving accreditation means that a company adheres to industry standards for safety and best business practices; maintains a trained, professional staff; and is dedicated to providing top-quality service.

# SUPERIOR EXPERTISE

Built on experience, safety, reliability and commitment to performance.

# HELPING TO REBUILD

the nation's infrastructure

Since 1939, NG Gilbert Services has performed new line construction, rebuilds, upgrades, maintenance and line clearance service for utilities across the U.S. Whether working to restore power after a major storm, reconducting a distribution line or removing trees within a right of way, NG Gilbert crews are hard at work safely delivering expertise to its utility clients.

We strive to contribute to our client's success by nurturing a culture of excellence, safety and continuous improvement that is demonstrated from project beginning to project end. We are not satisfied until our client's goals are fully met.

## Distribution and Transmission Line Management

Working in conjunction with International Brotherhood of Electrical Workers crews, NG Gilbert provides superior line construction expertise and high-quality performance. Expertise in the area of distribution line work includes new installations and rebuilds, line conversions and relocations, line maintenance, reconductor projects and pole placement. Technical staff and construction crews

are experienced in transmission line work including construction and rebuild of transmission lines; construction of wood poles, concrete structures, steel poles, and steel lattice towers; construction and rebuild of substations and interconnects; and construction rebuild and maintenance of overhead and underground distribution lines.

## Line Clearance

NG Gilbert provides tree trimming, power line clearances and integrated vegetation management services to electric utilities including tree pruning, tree removal and/or brush clearing activities, which often include herbicide application to weeds and other undesirable growth.

Our crews are experienced and equipped with all the resources needed to accomplish the job at hand. We know the importance of doing the job right, the first time, every time.

## Storm Restoration

We provide emergency storm services for utilities and municipalities following hurricanes, ice storms, wind bursts and other natural disasters, drawing upon years of experience in responding to these events. Extensive equipment and staff resources across the country, coordinated by a focused and experienced Storm Response Center, help provide timely mobilization of crews to storm or disaster areas for line clearing, power restoration and debris removal.

Before a storm hits, the team in our Storm Response Center follows its projected path. Our crews are put on alert and our existing utility clients are contacted regarding available resources. NG Gilbert Services crews show up fully equipped and ready to spring into action, supported by a logistics team that coordinates with the utility's own emergency response team.

No matter the service, our team approaches each job with the utmost care for the safety of both our crew and your constituents.

# SAFETY IN EVERY SERVICE
